- ✓ JavaScript, TypeScript, OOP, FP, ES6+, asynchrony
- ✓ Node.js, Express.js, React.js, NestJS, TypeORM, REST, API, TDD
- ✓ Relational and non-relational databases, MySQL, MongoDB, Git, Scrum

FULL-TIME COURSE - PHP DEVELOPER

A 6-month stationary PHP programming course where I learned, among other things:

- ✓ Introduction to PHP, HTML, CSS, XML
- ✓ MySQL, Postgres, ERD Diagrams, UML
- ✓ JavaScript Object Oriented Programming

ONLINE COURSES

- ✓ Programming in JavaScript
- ✓ React from scratch
- ✓ Advanced projects in CSS and JavaScript
- ✓ Node.js, Express i MongoDB
- ✓ Introduction to Git and GitHub

PROJECTS

Head Hunter [NestJS React TypeScript]

https://github.com/tomczer2t/head_hunter_front
https://github.com/tomczer2t/head_hunter_back

The Head Hunter project is the last stage of the annual Full Stack JS Bootcamp, it was created in the Scrum system by a 6-person team. The application combines all the knowledge and technology that we learned during the bootcamp. The application was created to connect future programmers with recruiters.

Email orders [Express React TypeScript]

https://github.com/majcherrr87/zamowienia_email_front
https://github.com/majcherrr87/zamowienia_email_back

The E-mail Order project was created for the needs of restaurants. Thanks to the Application, you can create a database of towatu suppliers and assign products to them, and then place orders via e-mail.

Portfolio [React]

<https://github.com/majcherrr87/Portfolio>
majcher.networkmanager.pl

The portfolio application was written using the React library, you can learn more about me, see completed projects and send an e-mail to me.
